

EXPLORE FURTHER

Questions to engage your explorer's curiosity

-  Which of these items is not "natural?" (the piece of plastic). How did the plastic get there? Where will it go next? What does "natural" mean? Are humans natural?
-  Which of these items could be a home for another animal? (The rock could be a home for seaweed, or a small crab could live under it. A small hermit crab could live inside a seashell. Something could float on driftwood. Lots of things live in sand dunes such as insects, birds, crabs.)

BEACH

SCAVENGER HUNT

crab

barnacle

bird

seashell

seaweed

piece of plastic

smooth rock

driftwood

sand dune

sea star

footprints

cloud
